EDUCATION

The Pennsylvania State University

BSc in Computer Engineering

Anticipated May 2026

State College, Pennsylvania

RELEVANT EXPERIENCE

IoT Handover System – Capstone Project

August 2025 – December 2025

Exacta Global Smart Solutions | Penn State University

State College, Pennsylvania

- Led a 4-member engineering team to design a scalable IoT handover system across sensors, gateways, and cloud infrastructure
- Built a Django-based dashboard to visualize real-time IoT data and optimize data pipeline performance
- Coordinated weekly technical demos and stakeholder updates with industry sponsors and faculty
- Awarded 2nd Place at the international oneM2M Hackathon for real-time handover design

Undergraduate Research Assistant (Stock Market Analysis)

September 2025 – December 2025

Penn State University Information Science Technology Department

State College, Pennsylvania

- Developed an interactive dashboard to pull and visualize stock price data, enabling efficient exploration of market trends
- Analyzed price movements using statistical methods (mean, SD) to identify volatility patterns
- Applied predictive modeling to evaluate trend direction and deliver insights for academic and industry use

Network Engineering Intern

May 2025 – August 2025

CIMB | Group Technology & Data

Kuala Lumpur, Malaysia

- Strengthened enterprise network reliability for core banking operations by configuring and deploying core infrastructure devices
- Resolved end-user connectivity issues and coordinated escalations daily to minimize downtime
- Documented and updated 50+ network components, reducing troubleshooting and audit time
- Assisted senior engineers in upgrading and testing network policies during after-hours maintenance windows, ensuring smooth implementation with minimal business disruption

LEADERSHIP & ACHIEVEMENTS

2nd Runner-up for CIMB X Microsoft Azure AI Hackathon

June 2025

AI Chatbot for Customer Support

Kuala Lumpur, Malaysia

- Collaborated as a team to build a customer support AI chatbot prototype projected to reduce help desk workload by 30%, automating high-volume inquiries via voice, text, and image inputs
- Delivered a minimum viable product within 5 hours and pitched the solution to CIMB executives and Microsoft engineers, earning a Top 3 award

Vice President

August 2023 – May 2024

Penn State Malaysian Students Club

State College, Pennsylvania

- Facilitated cross-functional coordination through bi-weekly executive board meetings, improving communication and initiative execution
- Organized 6 cultural and community events with an average of 100 attendees for each event, boosting student engagement and organizational visibility
- Partnered with campus departments and external groups to secure resources and deliver events on time and within budget

SKILLS & INTERESTS

- **Technical Skills:** Python • Microsoft Azure & Azure AI/ML Services • Excel • Data analysis
- **Soft Skills:** Analytical thinking, problem-solving, collaboration, effective communication, and presentation
- **Interests:** Running, cycling, weightlifting, piano, guitar, reading, volunteering, and sustainability
