EDUCATION

The Pennsylvania State University
BSc in Computer Engineering

August 2022 – May 2026
State College, Pennsylvania

TECHNICAL EXPERIENCE

IoT Handover System – Capstone Project

Exacta Global Smart Solutions | Penn State University

August 2025 – December 2025

State College, Pennsylvania

- Awarded 2nd Place at the International oneM2M Hackathon for designing a scalable IoT device handover architecture
- Led a 4-person team to design and deploy an IoT backend enabling real-time device handover
- Built a Django-based telemetry system with REST APIs to support high-frequency data ingestion, monitoring, and system stability

Network Engineering Intern

CIMB | Group Technology & Data

May 2025 – August 2025

Kuala Lumpur, Malaysia

- Configured and supported enterprise network infrastructure for core banking systems
- Diagnosed routing and connectivity issues, reducing downtime and improving operational reliability
- Documented 50+ network components to enhance troubleshooting efficiency and audit readiness

PROJECTS

SCOACH – AI Training Dashboard

March 2026

- Built a full-stack fitness dashboard translating training data into actionable insights by integrating Strava OAuth2 and Anthropic Claude API for personalized AI coaching
- Developed interactive data visualizations for weekly mileage, pace trends, and activity breakdowns using Recharts
- Implemented a multi-step onboarding flow feeding user profile data and real activity history into a Claude-powered coaching report

Personal Engineering Portfolio Website

December 2025

- Designed and deployed a responsive portfolio using React with modular component architecture and dynamic project rendering
- Configured custom domain, DNS records, and CI-based deployment via GitHub Pages

Minute Z-Score Trader

September 2025

- Built a Python-based intraday trading model using a custom Volume $\times$ Candle Body (VB) momentum signal with moving-average smoothing to generate long/short signals
- Evaluated strategy performance using risk-adjusted metrics including volatility and cumulative returns
- Developed an interactive Streamlit dashboard to visualize candlestick data, trade signals, and strategy equity curves across configurable tickers and intervals

LEADERSHIP

Vice President

Penn State Malaysian Students Club

August 2023 – May 2024

State College, Pennsylvania

- Led bi-weekly executive board coordination and organized 6 large-scale cultural events (~100+ attendees per event)
- Coordinated sponsorships, budgeting and logistics to successfully deliver campus-wide cultural events

SKILLS

- **Technical Skills:** Python, C++, SQL, Excel, Power BI, AWS EC2, Azure AI, Docker
- **Soft Skills:** Analytical thinking, problem-solving, collaboration, effective communication, and presentation
