EDUCATION

The Pennsylvania State University **August 2022 – May 2026**
BSc in Computer Engineering *State College, Pennsylvania*

K-Youth Development Programme, BI & Data Analytics track **July 2026**
SQL, Power Query, Power BI

EXPERIENCE

Data Analyst **August 2026 – Present**
Khazanah Research Institute *Kuala Lumpur, Malaysia*
K-Youth placement; offered a contract data analyst role six weeks in

- Built the charts and data pipeline for a Tableau dashboard for a research project, working with researchers and a data engineer.
- Leading a public scrollytelling page (D3, GSAP) that makes the research readable for a general audience.
- Use agentic AI workflows (Claude Code) daily to ship faster than a solo analyst normally could.

Capstone Team Lead **August 2025 – December 2025**
Exacta Global Smart Solutions | Penn State University *State College, Pennsylvania*

- Awarded 2nd Place at the International oneM2M Hackathon for designing a scalable IoT device handover architecture
- Led a 4-person team to design and deploy an IoT backend enabling real-time device handover
- Main integrator between the hardware and software teams; built the initial Django app, a telemetry system with REST APIs for high-frequency data

Network Engineering Intern **May 2025 – August 2025**
CIMB | Group Technology & Data *Kuala Lumpur, Malaysia*

- Configured and supported enterprise network infrastructure for core banking systems
- Diagnosed routing and connectivity issues, reducing downtime and improving operational reliability
- Documented 50+ network components to enhance troubleshooting efficiency and audit readiness

Teaching: Assistant Grader → Learning Assistant **August 2023 – May 2026**
Penn State College of Engineering *State College, Pennsylvania*

- Graded assignments and exams for 100+ students a semester; later ran office hours, built rubrics and proctored exams for undergrad computer engineering courses.

Vice President **August 2023 – May 2024**
Penn State Malaysian Students Club *State College, Pennsylvania*

- Led bi-weekly executive board coordination and organized 6 large-scale cultural events (~100+ attendees per event)
- Coordinated sponsorships, budgeting and logistics to successfully deliver campus-wide cultural events

PROJECTS

SCOACH – AI Training Dashboard **March 2026**

- Built a full-stack fitness dashboard integrating Strava OAuth2 and Anthropic Claude API for personalized AI coaching
- Developed interactive data visualizations for weekly mileage, pace trends, and activity breakdowns using Recharts

Personal Engineering Portfolio Website **December 2025**

- Designed and deployed a responsive portfolio using React; CI-based deployment via GitHub Pages

Minute Z-Score Trader **September 2025**

- Built a Python-based intraday trading model using a custom Volume × Candle Body (VB) momentum signal with moving-average smoothing
- Developed an interactive Streamlit dashboard for candlestick data, trade signals, and strategy equity curves

SKILLS

- **Languages:** Python, SQL, C++, JavaScript
- **Building:** React, Node.js, Django, Streamlit, Docker, Git, GSAP
- **Data:** Power BI, Power Query, Excel, Pandas, Tableau, D3.js
- **Infrastructure:** AWS EC2, Azure AI, Linux, Cisco CLI
- **AI tooling:** Claude Code, Claude API, Azure AI Foundry

INTERESTS

Guitar (indie rock, slowly working through The Strokes); running, coached by an AI I built; novels.
